

ANNUAL MEETING OF THE CUMBERLAND CHAPTER OF URISA

Friday, January 29, 2016
9:00 AM – 4:30 PM EST

AGENDA

- 9:00 a.m. **Registration**
- 9:30 a.m. **Welcome and Introductions**
- 10:00 a.m. *The Advancement of Business GIS in an International Corporation*
Beth Tyrie, Fruit of the Loom, Inc.
- 10:30 a.m. *Leveraging the ESRI GeoEvent Processor, Hadoop and Integrating Real-Time Information*
Jeremy Gould & Vineet Kumar, Kentucky Transportation Cabinet
- 11:00 a.m. *Leveraging LiDAR Partnership Data for Engineering & Other Applications*
Carl Shields & Dan Farrell, PLS, Kentucky Transportation Cabinet
- 11:30 a.m. *Digital Detection for MS4 Program Efficiency: Leveraging Dollars and Data*
Meghan Dunn, GISP, CFM, AECOM
- 12:00 p.m. **Lunch and Student Poster Competition**
Competition Sponsored by [Fruit of the Loom, Inc.](#)
- 1:30 p.m. *Status of the Newly Implemented GISP Exam*
Kim McDonough, GISP, Tennessee Department of Transportation
- 2:00 p.m. *Community TIGER Program*
Daniel Donello & Anne Jeffers, US Census Bureau
- 2:30 p.m. *Status of K-12 Geography Education in Kentucky and Tennessee*
Kurt Butefish, Tennessee Geographic Alliance & Kentucky Geographic Alliance
- 3:00 p.m. *UAV Technology and its Rules/Regulations*
Eric Muncy, Precision Products
- 3:15 p.m. **Networking Break and Raffle**

Chapter Business

- 3:45 p.m. Business Meeting and Installation of New Officers (All Are Welcome!)
 - Operational Issues and Concerns (website, finances, membership management)
 - Chapter Mission (including collaboration with other state geospatial organizations)
 - Membership (chapter update and URISA's Unified Membership Model)
 - Activities/Programs/Objectives for 2016
 - Installation of new officers and recognition of those whose term has ended
 - Selection of new Secretary and Treasurer

A Big Thank You to Our Generous Event Sponsors!

FRUIT OF THE LOOM®

Fruit of the Loom, Inc. is a leading global company specializing in the design, manufacture, and marketing of a number of iconic family apparel, athletic apparel, and sporting equipment brands including Fruit of the Loom®, Vanity Fair®, Spalding®, Russell Athletic® among others. Our family of brands is devoted to enriching every day through comfort, performance and fun. We are dedicated to the social and environmental responsibility in the communities we serve around the world. The company maintains an appropriate balance of internal manufacturing and responsible sourcing of our products in a legal, ethical and responsible manner. Fruit of the Loom, Inc. is driven by market demands, innovation, and a strategy clearly focused on meeting consumers' expectations. The Fruit of the Loom brand originated in 1851, and today the company is an independent, wholly owned subsidiary of Berkshire Hathaway, Inc. Corporate offices are headquartered in Bowling Green, Kentucky.

GRW is a full-service engineering, architectural, and geospatial consulting firm. The company was founded in 1964 by Mr. G. Reynolds Watkins to provide engineering services to federal, state, municipal and private industry clients. Since that time, GRW has grown to become a national design firm with offices in Kentucky, Indiana, Ohio, Tennessee and West Virginia. Watkins' insistence on technical excellence and personal service lives on as the guiding principle at GRW. This dedication to service has resulted in repeat clients providing 90 percent of GRW's current workload! The ability to define the relative position of a feature on the earth's surface has transformed the way we live our lives. From using GPS technology for driving directions, to locating a utility line on a mobile app, geospatial services are the foundation of many pioneering projects. Offering the latest technology, GRW specializes in highly accurate data solutions designed to meet your needs and budget. From aerial photography and orthoimagery to GIS design and data conversion, we have the expertise and resources that will ensure the success of your project. We have an experienced team of certified photogrammetrists, certified GIS professionals, and licensed surveyors. Our specialized skills include airport obstruction analysis, monumentation and GPS surveying, height modernization, aerial LiDAR, mobile terrestrial LiDAR, and stationary terrestrial LiDAR services.

GISbiz is an IT software solutions company specializing in geospatial applications. GISbiz offers mobile, web, and desktop software solutions to utilities, government agencies, and commercial organizations by utilizing the latest technologies from Apple, Microsoft, Google, Oracle, and ESRI. Our mission is to add great business value to our clients by delivering technology services in a professional and timely manner. GISbiz is a privately held corporation, incorporated in the state of Tennessee and has been successfully serving clients since 2003. The company has been established and run by people with strong expertise and professional integrity. In 2010, Nashville Technology council ranked GISbiz as one of the top innovative technology companies in the Nashville area. We are a DBE small business and certified by SBA as an 8(a) company.

KCI's Geospatial Solutions Practice offers comprehensive IT solutions to our clients through innovative thinking and technology. Focusing on GIS technologies, our staff of trained professionals covers the spectrum of technical services - from needs assessments to cartographic design, web development to document management, field data collection to engineering document research, and asset management to program management. For more than 20 years, KCI has been applying GIS technology for clients in virtually every technical discipline. Whether analyzing environmental impacts in a potential corridor for a magnetic levitation (Maglev) train or creating an ESRI-based critical infrastructure database for the City of Baltimore, KCI's GIS professionals have consistently demonstrated a mastery of GIS technology and its versatile applications. KCI is proud of its record of completing projects on time and within budget.

Established in 2010, Metro GeoSpatial provides high accuracy LiDAR and Imagery data acquisition and geospatial services utilizing our Trimble System (LiDAR and Digital Camera). Our unique design is easily adaptable for helicopter or fixed wing platforms, and we routinely complete projects using both. Metro GeoSpatial has developed the HALIS® (High Accuracy LiDAR & Imagery Solutions) methodology with the Trimble system, resulting in proven engineering accuracies for a number of projects. We have successfully completed projects in the Transportation, Federal, Energy, Environmental, and Municipal markets utilizing the HALIS® methodology. Our experience delivering high accuracy products provides our clients the highest level of quality and satisfaction resulting in a heavy rate of return clients. Metro GeoSpatial strongly believes that our equipment, knowledge, and personnel make us highly qualified to provide a variety of solutions for the geospatial industry. Expanding on our airborne LiDAR and Imagery acquisition knowledge, Metro GeoSpatial is developing UAV survey grade solutions. Metro GeoSpatial is WOSB Certified (Woman Owned Small Business).

Woolpert is a national architecture, engineering and geospatial (AEG) firm that delivers value to clients by strategically blending engineering excellence with leading-edge technology and geospatial applications. With a dynamic R&D department, Woolpert works with inventive business partners like Google; operates a fleet of planes, sensors and unmanned aerial systems (UAS); and continually pushes industry boundaries by working with advanced water technologies, asset management, Building Information Modeling (BIM) and sustainable design. Woolpert's mission is to help its clients progress—and become more progressive. For over 100 years and with more than 25 offices across the United States, Woolpert serves the needs of federal, state and local governments; private and public companies and universities; energy and transportation departments; and the United States Armed Forces. For more information, visit woolpert.com or call 937-531-1258.
